9.1.1. Software Dissemination and Internet Visibility

The CONVECS team distributes several software tools: the CADP toolbox (see 5.1), the TRAIAN compiler (see 5.2), and the PIC2LNT translator (see 5.3). In 2012, the main facts are the following:

- We prepared and distributed 11 successive beta-versions (from 2010-h to 2010-m, from 2011-a to 2011-c, and from 2012-a to 2012-b “Zurich”) of CADP.
- We were requested to grant CADP licenses for 1227 different computers in the world.
- We released version 2.7 of the TRAIAN compiler for LOTOS NT in November 2012.
- We released version 2.0 of the PIC2LNT translator from an applied π -calculus to LNT in October 2012.

We constructed the CONVECS Web site (see <http://convecs.inria.fr>) and we updated it with scientific contents, announcements, publications, etc.

By the end of December 2012, the CADP forum (see <http://cadp.inria.fr/forum.html>), opened in 2007 for discussions regarding the CADP toolbox, had over 230 registered users and over 1400 messages had been exchanged.

- Formal modeling and verification of BPEL-based Web service composition [62],
- A specific-domain design tool for FPGA-based image and video processing system [63],

At this occasion, a short movie [The Turing Machine Comes True](#) was released on the "Real Turing Machine" built from a [student team](#) from the Computer Science Department of ENS de Lyon. We do not mean to simulate a Turing machine as it is indeed very easy to simulate a Turing machine on a modern computer. The challenge was really to build a purely mechanical Turing's machine using only LEGO bricks, gear, rod, pneumatic jack...

8.4. Popular science writing

The members of IBIS are actively involved in the dissemination of research results in systems biology and bioinformatics to a wider, non-specialist audience. François Rechenmann is leader of the editorial committee of the Interstices (<http://interstices.info>). Interstices offers pedagogic presentations of research themes and activities in the computer science domain, including at its interface with life sciences.

In the context of the **Math C2+ initiative** for high-school students, François Rechenmann has led two sessions of a workshop introducing the notion of algorithm. The objective set to the students was to design an algorithm for sorting a stack of objects, such as pancakes, according to their size and through only one type of swapping operation (see <http://interstices.info/algo-crepes> for the presentation of the algorithm).

8.5. Teaching

Four members of the IBIS team are either full professor, associate professor or assistant professor at the Université Joseph Fourier or the Université Grenoble Alpes in Grenoble. They therefore have a full teaching service (at least 192 hours per year) and administrative duties related to the organization and evaluation of the university course programs on all levels (from BSc to PhD). Besides the full-time academic staff in IBIS, the following people have contributed to courses last year.
